**Subject:** Update: EPA adds CFAC to the National Priorities List

Hello,

This is a courtesy notification to you that the EPA will add the Anaconda Aluminum Co Columbia Falls Reduction Plant site, also known as the Columbia Falls Aluminum Company (CFAC) site, in Columbia Falls, Montana, to the National Priorities List (NPL) on September 9, 2016. Sites on the NPL are often referred to as Superfund sites. Superfund is the federal program that investigates and cleans up contamination at sites that pose a risk to human health and the environment.

A notice of the listing is scheduled to publish in the Federal Register September 9, 2016. I will send out additional information after the Federal Register notice publishes. EPA will also set up a public meeting in Columbia Falls to discuss with the community the next steps and outline how the public can engage in the Superfund process moving forward.
